📄 PROFILE

Unity Gameplay Programmer with professional experience extending production systems and building modular gameplay architecture. Strong background in combat systems, UI integration, save systems, and scalable player mechanics. Currently developing an original project as a solo dev. Seeking remote opportunities in programming or systems development.

🎓 EDUCATION

Bachelor's degree in video game design and development
Invader Institute [🔗](#)
Mexico

Ongoing self-directed learning and independent research.

🧰 PROFESSIONAL EXPERIENCE

Gameplay Programmer Megalixir Games - Invader Institute

2024 – Present

Unity, C#, GameCreator 2

- Extended and customized Game Creator 2 core systems through C# modules to support project-specific gameplay requirements.
- Designed and implemented puzzle systems, including internal logic and asset integration.
- Developed and implemented user interface (UI) systems, including debug tools and seamless gameplay integration.
- Refactored and optimized core gameplay systems to improve scalability, maintainability, and runtime performance.
- Collaborated within a small development team using Git-based version control workflows.

📁 PERSONAL PROJECTS

Thousand Paths [🔗](#)

2D Metroidvania | Unity, C#

Nov 2023 – Development Paused

- Led full game development including programming, systems, mechanics, UI/UX implementation, asset integration, and audio.
- Designed and implemented a modular ability and weapon system.
- Developed a dynamic map system with metroidvania-style progression logic and gated exploration mechanics.
- Built an interactive UI system supporting multiple gameplay menus with smooth navigation.

Neon Breakline [🔗](#)

2D Action Runner | Unity, C#

Feb 2026 – Apr 2026

- Led full game development including programming, systems, mechanics, UI/UX implementation, asset integration, and audio.
- Implemented constant forward-movement mechanics along with jump, attack, slide, and parry systems.
- Designed structured levels and balanced mechanics to maintain continuous gameplay flow.

🧠 TECHNICAL ABILITIES

Languages

C# (Advanced), TypeScript, JavaScript.

Systems / Mechanics

- Modular gameplay architecture
- Combat systems
- Save/load systems
- UI systems
- Debug tooling
- Version control (Git)

Other

Experience using Photoshop, After Effects, Substance 3D, Maya, Wwise, Audacity.

Engines

Unity (Advanced)
Basic familiarity with Unreal Engine & Godot

Tools

- Git (version control)
- Visual Studio & Visual Studio Code
- Effective use of AI tools to support development workflows and technical documentation
